

## TYRANT OF ESHANESS v1 background information

So having been cornered , as usual, here by the pressure group, security trash and their internet ammo multimedia pervert chums , playing acting at being young conservative association Assertive bully Raouls, while trying to knock over my toys, I mean the new ones the website and emails to various authorities not the lot from years ago the cartoonist which they kept trying to steal from I was already you might say regularly 'Primed' by the typical flash card harassment sessions at all times of the day and night.

Which from my point of view can be seen as an abuse of 'subjudice' too, by intimidating complainants.

Now looking out the window at Brae you are unlikely to be thinking tabloid journalism, your eye passes over the fire and police stations, what a dump.

But those creatures who are snooping , beating, taking etc on my production with their short wave club and their internet ammo LED flash cards , are clearly security channel networking personae / or hosting freelance to the likes of News International, the Express, The Mirror, Sunday Mail et al reactionary tabloid crap piles. SO unless you personally or the staff of brae health clinic are willing to be tame lapdogs to a dirty bunch of libellous coercive troublemakers for the rest of your career in the Shetlands, I am not the enemy,

In fact I appear to be the only person who cares to contest their imposture and I intend to get them back by publicising all their dirty tricks.

The enemy contrives trash articles against both nhs and patients for example about 50,000 assaults at nhs hospitals per year, patients sexually molested , left in their etc etc, so many one flew over the cuckoo's nest nurse Ratchet big pharma assaults in UK mental hospitals etc, see 'Impertinence of Psychoanalysis', But considering the huge unpleasantness the tabloid crap piles have swallowed this last week they ought to be sated. Yet they leave that sick automated bully bundle flash card machine running aimed at my home., and around Brae # Do they imagine we here in the Shetlands are all here growing an annual woolly coat fro their convenience. And you too Calumn, don't expect any favours from contention mongreing trash for recording my being over agitated.

Another thing does any body at Brae clinic know who that young woman with pronounced midland accent claiming to be a pharmacist is she sounded like a put up job from the Sun Newspaper to me.. She was about to go tell you lot what she had ordered, They will get nowhere with me on any subject particularly my private relations with the nhs.

I have no intention of cooperating or collaborating with the snooping attention grabbing trash on any subject whatsoever, my relations with the various branches of NHS Scotland , Grampian, nor nhs Shetland which they have tried to compromise for years, way back to the Berlin wall coming down era. I am not going to explain what opportunists were buying up at that time and how they have got off with their Telecommunications de regulation rackets for so long, while stoking up a campaign and petition.

Who else are they doing that to? Apart from Stuart Hill and Irvine a woman who doesn't get to have a first name. in the Shetland Times reportage . Front page  
Are they bothering you Calumn?

That sort of contention probably not in your experience, though you evidently deal with people seriously worried over their health difficulties. I told you I only wanted an official appointment. IF you had said that you had referred me to GBH for that first off so I was officially on a waiting list there would have been no agitated response from me, and if that phone call was recorded I know that is a weird suspicion but I have some insight into psychological manipulation Whether it is conscious or subconsciously played out because in the larger everyday and night business of those political pressure group freaks and their multimedia attention seeking disorder , that is all they have done for a long time, in fact it is why I was allowed to shift from the hills wick clinic to the brae clinic.

I wont go into the rest of the trouble they have aimed at me here it would take a 3 page essay .

# including the morning of the day a calor gas canister blew the Griffiths house flat late in the afternoon, while I had moved on to Lerwick

## If so the sequencing of the communications is compromised and may be understood as a manipulation of my patience, not about waiting as I told you I want to be in the regular queue not A&E , .

### I had just looked up the meaning of 'embolism' a few minutes before you rang, I was thinking about the look of the hernia and whether there were blood vessels in the lump, which was losing its near half boiled egg shaped stretched appearance a bit. over the steroid slightly massed hardened up join. which isn't inflammation. Along with the advice that I should ring 999 for an ambulance which I wrote to you about in an email after you were here I do not want to be associated with pushing for a third ambulance emergency in one year , for priority, after all the dedicated treatment I have had, from GBH ward one and ARI ward 208, the 7 weeks of care which has kept me in the land of the living. It is rough that this has complicated their work.

You can show this to the clinic management and the Shetland nhs executive Mr Dickson he doesn't have an email address to the general public for obvious reasons. . The aforementioned would be after him constantly, now they have lost Nicola sturgeon, to the new man Hunza, whatshisname isn't quite suitable to drag around in the dirt though is he.
